

# Web based HiPath DX management

DXWeb Professional provides an intelligent link into your HiPath DX, Realitis DX and iSDX either through the new web browser software or traditional client software.

The DXWeb Professional user-friendly interface eliminates the need to understand complex mnemonic commands. This combined with the central database within the software, makes management of your switch easier, faster and more accurate.

## Key features

- User-friendly interface
- Off-line programmable actions for unattended updates
- Central database of all your DX systems
- Full extension, trunk & system manipulation
- Automatic fault-viewing
- Automatic log-in to your switch via LAN or dial-up
- Powerful script editors for mass changes
- No need for client software
- Minimal bandwidth required to operate software

## This leads to:

Significant cost savings associated with DX management:

- Faster response to your users needs
- More efficient use of your existing hardware
- Faster implementation of changes
- Simple interface replaces complex commands
- Single or multiple DX management
- Database held of switch configuration
- On-line or scheduled batch moves & changes
- Windows & NT, browser operation
